**About partners:**

**ASSOCIATION FOR SUSTAINABLE DEVELOPMENT SFERA MACEDONIA BITOLA**

We have experience in many local and international youth projects related to a big variety of topics such as environment protection and recycling, sport and health, art and creativity, team building, non formal education methods and youth work, discrimination and democracy and the topics of improving the professional and leadership skills and competences. Our activities influence on a level of raising awareness between the youngsters in ecology and outdoor activities and sports, which we prove with our last 10 Erasmus + projects organized by our organization and the participation on more than 80 in the last year for which we do dissemination with workshops at primary schools and high schools. The projects that we organize on a local level are events like eco actions, workshops for creating art from garbage in the primary schools and high schools, eco parades, hiking and biking activities. We have a very good cooperation with the local TV and radio stations which we will use to promote the project during all the stages of its implementation.

This project is important for our organization because we work a lot with high school level kids and we are interested in projects for their age groups. We use these projects to attract new volunteers and members in our organization. Also, we have got a number of project in the "green" topics and we want to continue exploring this topic with our youth.

**ALKOTÓ IFJÚSÁGÉRT ALAPÍTVÁNY, HUNGARY**

Foundation for Creative Youth was started to support the creating activity of young people. During the past decades it has given a possibility to many young people in Szeged and its neighbourhood to take part in initiatives in local, national and international level.

We work with the age of 13-29. We give opportunity to try out various activities, fulfill their ideas and even organize international projects. We believe that every student has a hidden talent so we would like to give help and space to unfold it. In order to attract more students we work not only in our office, but we also organize school - visiting days and taking part of various events - with activities as required.

**FOR WHOM?**

**FOR YOUTH!**

We give opportunity to meet contemporaries, try to organize, be volunteers, look for and find challenges, develop their communication and other skills.

**FOR NGO-S!**

We believe in the strength of collaboration. The target is accomplishing our projects and initiations in collaboration with local NGOs and sharing the good practices with each other.

**FOR SCHOOLS!**

Students are most easily attained at the school. Our visiting occasions are not just for the students, but we help the pedagogues and generative activity with social programs and projects. We take part in the Erasmus+ program as the organizer and the convener and cooperate with the international initiatives. We are interested in participating in this project because we work closely with an informal group of young people called Green Beans and Mayonaisse (some of them have already expressed clear interest in being participants on this project) and we work together on environmental issues, especially recycling and upcycling. We want to share our knowledge on this youth exchange with other partners and to learn something new, for instance how to use healthy herbs. Furthermore, high school kids are our main target group so both the target group and the topic of this youth exchange match our priorities.

**RAZVOJNA AGENCIJA KOZJANSKO, SLOVENIA**

Development agency Kozjansko is a public organization, founded in 1999 in order to precede the development of two municipalities, Šentjur and Dobje. Youth center Sentjur has been the organizational unit of Razvojna agencija Kozjansko since 2009. It strives daily to reach out young people and youth organizations, counsel them and help them apply their own ideas into projects. It assists them to apply for local, national and European funds and enables them a meeting room for their meetings and activities. It executes different youth activities actively involving youth and provides every day activities for teenagers and other youth.

We organise various activities in different fields such as sports and healthy lifestyle, culture and arts, education and trainings, entrepreneurship and tourism, heritage, international projects etc. By our activities, we encourage young people to take active part in a local community and through that develop their key competences. We offer them opportunities to gain new experiences and become more employable. We have been working with young people for many years now and so we have a lot of experiences with local and international projects. Every week we organize activities for local youth and every year we either organize an international project in our community or we take part in another international project.
